

<p>This week's theme is....</p>	<p>...Mini Beasts!</p> 
<p>9.00</p>  <p>PE with Joe Wicks</p>	<p>https://www.youtube.com/channel/UCAxW1XT0iEJo0TYIRfn6rYQ</p>
<p>9.30</p>  <p>Drink and snack</p>	<p>It's important to drink lots of water to keep us healthy, especially after exercise. Have a glass of water and if you're hungry why not try a piece of fruit.</p>
<p>The following activities can be completed in any order but we recommend before lunch and with a short break between each one. We have identified how much time should be spent on each activity.</p>	
<p>30 minutes</p>  <p>Daily Reading</p>	<p><i>All about...</i></p> <h2 style="background-color: #90EE90; padding: 5px; text-align: center;">Spiders</h2> <div style="background-color: #E6E6FA; padding: 10px;"> <p>Spiders can come in all shapes and sizes. Some are so small they can sit on the head of a pin; others are bigger than a grown man's hand. Though people think they are insects, like bees and wasps, they are in fact arachnids. This means they have eight legs and not six. They also do not have antennae on their heads.</p>  </div> <p>Super Spider Facts You can find spiders on every continent of the world, except for Antarctica. It is too cold for them to survive there.</p> <p>Different Types of Spider The largest spider in the world is the Goliath bird-eating spider. They are named after the famous giant in the Bible story of David and Goliath. They live in South America, in the rainforests. The name is a bit confusing, as they don't actually eat birds. They mostly eat worms and toads.</p> <p>The smallest spider in the world is Samoan moss spider. They are about the same size as a full stop. Even though they are tiny, these spiders are still very poisonous but their fangs aren't long enough to bite into a person's skin.</p> <p>Some More Amazing Spider Facts</p> <ul style="list-style-type: none"> • There are about 40 000 species of spider in the world. • Fear of spiders is known as arachnophobia. • Most spiders are completely harmless to people. Only a few species are venomous. • Some spiders are covered in hairs which can make skin very sore.

	<p>Nearly all spiders catch their food by making a web that acts like a trap. This web is made from very thin but very strong silk. When insects fly into it, they get stuck and the spiders can then wrap them up in even more silk. Spiderwebs are very beautiful, made up of hundreds of small shapes, and can take a spider days to make. There are some spiders that don't make webs. They hide in holes in the ground and jump out on their prey as they walk past.</p> <ol style="list-style-type: none"> 1) What kind of animals are spiders? 2) Name two ways that spiders can defend themselves. 3) What is the world's smallest spider called? 4) What do spiders make to catch food? 5) Why is 'Goliath bird-eating spider' a strange name? 6) What do spiders make their webs with? 7) In what two ways are spiders different from insects? 8) Where would you choose to live if you had arachnophobia?
<p>5 mins</p>  <p>Brain Break</p>	<p>Place your hand on your belly. Take 10 deep breaths and notice your hand moving up and down as you breathe.</p>
<p>45 minutes</p>  <p>Daily Writing</p>	<p>Today's task is for you to get creative! Using this picture as inspiration, you could write a diary entry, a description, a poem, a set of instructions, a play script, a conversation, a story...the choice is yours! The only rule is...it has to be 100 words long! (To be kind, we'll say that it can be between 98-102 words- but see if you can make it exactly 100!)</p> <p>Try to include some of the techniques you've learned this year, like expanded noun phrases, fronted adverbials, modal verbs and the passive voice.</p> 
<p>5 mins</p>  <p>Brain Break</p>	<div style="display: flex; justify-content: space-around; align-items: center;"> <div style="border: 1px solid lightblue; padding: 10px; text-align: center;">  <p>Do 5 star jumps.</p> </div> <p>then</p> <div style="border: 1px solid lightblue; padding: 10px; text-align: center;">  <p>How many times can you hop on one foot?</p> </div> </div>

<p>45 minutes</p>  <p>Daily Maths</p>	<p>Friday Funday!</p> <p>Let's play some maths games today: https://www.bbc.co.uk/bitesize/topics/zd2f7nb/articles/zn2y7nb https://play.trockstars.com https://www.topmarks.co.uk/maths-games/hit-the-button</p>
<p>Lunch</p>	<p>These pepper and onion melts look amazing! https://www.nhs.uk/change4life/recipes/pepper-and-onion-melts</p>
 <p>Story Time with School</p>	<p>Today, we're going to carry on listening to 'Point Blanc' by Adam Horowitz. Click in the link to listen to the second part of chapter 9. https://www.youtube.com/watch?v=U1xZVQ_m1BE</p>
 <p>Weekly Challenges</p>	<ol style="list-style-type: none"> 1) Try making these mini beast crafts: <div style="text-align: center;">  </div> 2) If you have a garden or access to a natural area, go on a mini beast hunt to see what you can find. Can you classify them into different types of living thing? 3) Play this bug builder game to create your own mini beast! https://www.pestworldforkids.org/games/bugbuilder/index.html 4) Find out all about insects here: https://web.extension.illinois.edu/insects/01.html 5)

5) Can you follow the step by step guide to drawing and shading your own spider?

6) Create your own minibeast garden. You will need to research what you might need, the best place to create one etc. Keep checking every day to see what minibeasts you can find. You could make some signs and labels for your garden.

When you go for your daily walk, see how many different minibeasts you can spot. Keep a tally of them and present your information in a bar chart. Squared paper has been attached.

Minibeast Recording Sheet

Complete the table as you find each minibeast. Put a tick in the box where each minibeast was found.

					
dragon fly 					
snail 					
bee 					
crane fly 					
ant 					
butterfly 					
beetle 					
woodlouse 					
fly 					
worm 					
millipede 					
ladybird

	<p>Remember everyone's date of birth is set as 26/03/20</p> <p>Don't forget to keep checking twitter for other fun activities: https://twitter.com/Year5Long https://twitter.com/LongOasis</p>
 	<p>We'd love to see your work and the things you're getting up to at home so don't forget to email or tweet us photos. Remember to only include a photo of your child if you're happy for their image to be shared.</p> <p>You can email your photos to LCR-Year6.Support@oasislongcross.org</p>

Reading answers:

Answers

1. What kind of animal are spiders?
Spiders are arachnids.
2. Name two ways that spiders can defend themselves.
Spiders can defend themselves by biting or using hairs that make skin sore.
3. What is the world's smallest spider called?
The world's smallest spider is the Samoan moss spider.
4. What do spiders make to catch food?
Spiders make webs to catch their food.
5. Why is 'Goliath bird-eating spider' a strange name?
It is a strange name because they don't even eat birds. They eat toads and worms.
6. What do spiders make their webs with?
Spiders make their webs by spinning silk.
7. In what two ways are spiders different from insects?
Spiders are different from insects because they have 8 legs, not 6. They also don't have antennae.
8. Where would you choose to live if you had arachnophobia?
I would live in Antarctica because this is the only place where spiders aren't found.
